

Using HTA to Support Universal Health Coverage: Sharing Experience in HTAsiaLink

An introduction to provide updates on the progress of HTA development to support UHC

Wednesday, 11th May 2016, 09.00 – 12.30

Pre-conference Workshop at HTAi 2016 Annual Meeting, Tokyo

Universal Health Coverage (UHC) is high on the global agenda as there is a general consensus that accessing healthcare services should be comprehensive, affordable, as well as equitable. To promote UHC, Health Technology Assessment has been emphasized as an essential tool to provide reliable and robust evidence.

This workshop with the NECA will introduce participants to the progress of HTA development with a focus on country's activities related to support UHC in HTAsiaLink member countries.

If you want to find out more about HTAsiaLink and how they can use HTA and support UHC, please come to our pre-conference workshop.

Themes that will run through the workshop:

- Using HTA to support UHC
- Progress of HTA development
- Examples from HTAsiaLink member countries
